PROFESSIONAL SUMMARY

Analytical Data Scientist and Python Developer with proven expertise in data analysis, machine learning algorithms, and predictive modeling using Pandas, NumPy, and Scikit-learn. Experienced in querying databases using SQL and building Python data visualization applications.

CORE SKILLS & TECHNOLOGIES

Languages & Tools: Python, SQL, Git, GitHub, Linux, Docker, Jupyter
Data & ML: Pandas, NumPy, Scikit-learn, Statistics, Machine Learning, Data Analysis
Web & Databases: Flask, SQLite, PostgreSQL, REST APIs

WORK EXPERIENCE

Associate Data Scientist • DataSphere Analytics (2022 - Present)
• Built supervised classification and regression pipelines using Python and Scikit-learn.
• Analyzed millions of rows with Pandas and executed complex SQL queries against PostgreSQL databases.
• Created internal reporting dashboards with Python, Flask, and HTML/CSS.
• Maintained version control across multiple analytics projects using Git and GitHub.

EDUCATION

B.S. in Data Science and Statistics • University of Technology (2022)
